Scenarios for Learning Management System

Complete Lesson

Standard Scenario:

A learner wants to gain a better understanding about a topic covered in a lesson on the site. Note that the order of events within this scenario may vary.

1. The learner selects the desired lesson from the list of tutorials in the main menu.
2. For each section within this topic, the learner:
   a. Views main text content
   b. Views code examples
   c. Views output examples
3. The learner completes their task when they reach bottom of page

Take Quiz

Standard Scenario

A learner wants to review the content they have just learned in a lesson. The learner:

1. Selects the corresponding quiz option presented at the end of a lesson page.
2. Answers each question.
3. Submits the quiz for grading
4. Views the quiz result
5. Task completed.

Alternate Scenario

(Same goal as in standard scenario)

1. Selects the corresponding quiz option presented at the end of a lesson page.
2. Answer quiz questions.
3. Submits the quiz for grading
4. Views the quiz result
5. Make corrections to questions marked as incorrect (*repeat steps 2-4 n times*)
6. Task completion on correct answers for all questions
